

Best Practices

(2020-21)

1. During 2020-21 the Haryana Government drive "Harit Haryana Abhiyan, Unnat Haryana Abhiyan" implemented in the college. Through this initiative in the state, the dept and college aims not only to preserve and increase the forest and tree cover in the state for conserving biodiversity, but also to sensitize the students about their responsibilities towards state, society and environment. During the pandemic of Covid 19, students planted saplings near to their residence under the guidance of their teacher incharge /Mentor to prove this drive a success.
2. This college is located in Mewat area of Haryana state, which has an abysmally poor literacy rate in rural area at an average of 51.99, for male 68.56 and for females 33.71. This data shows that there is a lack of awareness towards female education in rural area. The college administration, teaching and non-teaching staff with due support of higher authorities strives hard to impart education to these girls of rural area. The college staff has been working tirelessly for the past many years to increase girls students in the college and we are getting success in this effort especially in the strength of muslim girls every year. During this year total 206 girls were admitted.
